REFERENCE LINE

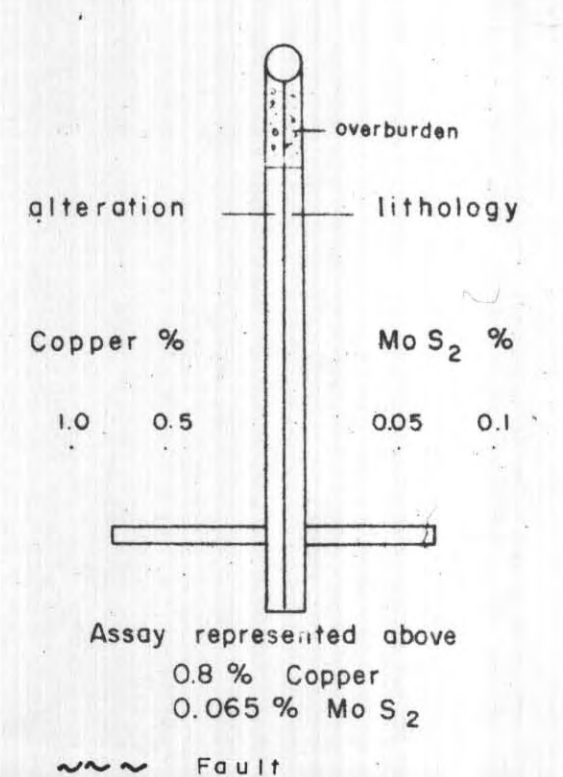

LITHOLOGY

- GUICHON BATHOLITH**
- X Guichon qtz. diorite
 - B Bethlehem qtz. monzonite
 - P Bethlehem ? Feldspar porphyry dyke
- TERTIARY COVER**
- V Volcanic flows — andesite — dacitic andesite
minor rhyolite
 - Δ Flow breccia — agglomerate
 - S Tuffaceous sandstone — siltstone — mudstone
 - Lithified soil profile

ALTERATION

- P₁ — Propylitic — insipient chloritization of mafics
 - P₂ —
 - P₃ — Propylitic — total chloritization of mafics
(fracture or pervasive epidote)
 - A — Argillic — feldspar soft or replaced
- GRAPHIC REPRESENTATION INDICATING DEGREE OF QUARTZ VEINING**
- a few quartz veins
 - ▨ well developed quartz stockwork
