

TARGET N° 3
strong alteration
pattern indicated

TARGET N° 2
strong alteration with
high density could indicate
mineralized shear structure

TARGET N° 6
anomalous density
weak alteration affect

TARGET N° 4
dyke ?

TARGET N° 5
high density with
strong alteration affect

TARGET N° 1 Anomalous
high density flank expression
with alteration affect apparent
over roof could indicate a
possible pipe and related structures

923/2E
923/5E-47

RELATIVE FRACTURE FREQUENCY
TECTOFACIES DERIVATIVE
(fracture density values corrected for lateral varying
tectonic aspect and the assumed affect of alteration)
