

LEGEND

- PORPHYRITIC FLOW ROCK**
 - Generally no Amygdules
 - Phenocrysts of Olivine and/or Hornblende
 - Commonly with inclusions of small volcanic rock fragments.
 - AMYGDALOIDAL FLOW ROCK**
 - Prominent Amygdules in non porphyritic fine grained groundmass
 - Red to reddish grey color
 - PORPHYRITIC AMYGDALOIDAL FLOW ROCK**
 - Amygdules variable in density and size
 - Phenocrysts of Olivine and/or Hornblende in fine grained reddish groundmass
 - Commonly has inclusions of small rock fragments
 - PARTICLE TUFF**
 - Generally fine grain and dense with compositional banding
 - Color reddish brown
 - Some areas arenaceous
 - CRYSTAL TUFF**
 - RHYOLITIC ROCK**
 - ANDESITIC ROCK**
 - VOLCANIC AGGLOMERATE**
-
- Bedding or Banding
 - Joints
 - Shear Zone
 - Outcrop Limits
 - Road-
 - Location Approx.
 - Location Known
 - Claim Name
 - Point on Chain and Compass Survey Line
 - Visible Copper, Mainly Chalcocite
