

Joint

First year hand data
and first notes diagrams
for each 200' of drift

one powder out along strike but
the "one fault" is continuous
& unconfined with the old
washings

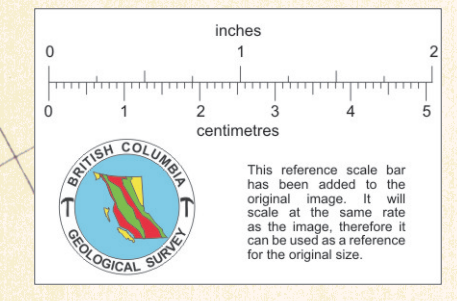

one powder is small but
still constant

the from the zone to slightly
above the beds is very good

Structural Synopsis
posture, possible in part
one zone roughly E-W here, local

501 Dr W to under wire?
potholes for 3, 2, 1

Duplicate 1, 2, 3 sublevels - 40 scale
