

**LEGEND**

- MINERALS**
- Sulphides
  - Epidote
  - Calcite
  - Magnetite
  - Garnet
- ROCKS**
- Lamprophyre
  - Silicified rock
  - Diorite
  - Bonanza Volcanics & volcanic breccia; trap dykes
  - Quatsino Limestone
- Fault, shear, slick surface, or open fracture

Mixed or altered rocks are shown by combining colours in a barred, cross-bared, or dotted pattern. Where the original rock is no longer recognizable only the alteration minerals are shown. Minor constituents are shown in some places by thinner bars or dots, but more commonly are omitted to reduce the complexity of the pattern.
