Dr. Ken Northcote
B.C. Dept. of Mines and Petroleum Resources
Victoria, B.C.

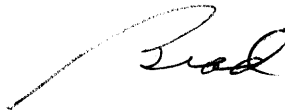

Dear Ken:

As you may know, Bill Botel and I have staked a block of ground extending west from the Island Copper boundary into the zone northwest of Coal Harbour. At the moment we are trying to put together whatever information is available on work done in the past. My last visit to Victoria was, I am afraid, timed inopportunately (say rather, inopportunately) on a Friday, so I wasn't able to get together with you. I am told that you are in possession of logs for several drill holes put down on MAR 7, and wondered, in view of the fact that the original owners let the ground drop, if it would be permissible for us to have copies of these logs. My information also indicates that at least one hole was drilled immediately east of Quatse Lake, probably while the ground was under option to Inspiration Copper. Do you have any particulars on work in that area?

92L/12E

I understand that the area around Kamloops looks to be busy this coming season. I would be most appreciative for any leads you could get me on job possibilities in that area. I hope things are going well with you, and I look forward to seeing you in the near future.

Sincerely

Bradford D. Pearson
