THOR - Limestone Deposit

On August 27th I visited this possible quarry, which is one mile East of Mile 93 on the B.C.R., north of Fort St. James and about 8 miles South ^{EAST} of the Indian settlement of Tachie, on Stuart Lake. This deposit is held by Northrock Industries Ltd., of Prince George, which also owns the Dahl Lake Quarry, a source of limestone for three area pulp mills. The Thor property covers limestone of the Cache Creek group and appears to be of excellent quality (supported by company analysis) and has been drilled enough to properly evaluate the deposit. The main reason for not producing from the property at this time is the unreliability of the B.C.R. It appears that this property has excellent large tonnage possibilities.
