

m. Rept. Aug 175. *Shroter*  
John Baker - Canadian Superior

Ⓐ 93L/15W #124

Ⓑ 93L/9E #18

On August 1st I talked with John Baker regarding his drilling programs on the <sup>(CIMBRIA)</sup> Big Onion porphyry prospect and the Topley-Richfield vein-type prospect located approximately 7 miles north of Topley. Canadian Superior completed 3 diamond drill holes at the Topley-Richfield property. At the Big Onion they completed a planned percussion drilling program and had started to do some more work when the machine rolled down a bank. A diamond drill may be employed at a later date.
