

Reserve
Memo

Geological Resource: no economical implied

MBL-66
Southern Star

016376

301,904,000 tonnes

extremely
detailed
calculation

gold avg 0.050 g/tonne

Copper 0.231% copper

calculation 0.4 g/t gold equivalent cut-off

cut-off

black energy

From

MT Milligan Project - Pre Feasibility Study

Volume 1 - Geology August 1991

- According to Rob Pease of Placer Dome in Kamloops this is the best and latest "reserve" calculation as of this date (March 1993). G.J.P. March 1993

P.S. This figure is what they (Placer Dome) call a ~~Geological Resource~~ "Geological Resource" in that although they have an economically derived cut-off they still don't consider it a Final economic reserve. The resource is for the MBL, 66 and Southern Star zones.
