Mt. Milligan Mark Rebagliati

>300k' of drill core this year

Queensel Trough

Cret Pluton nearby

but not ore hosts

Mt Milligan prop

monzo - diorites

chemically - mainly alkaline

Crocker anom. area ~8 km² response good to masked by glacial cover

IP response 4x4 km mag - SW mag anomalies

MBX stock -

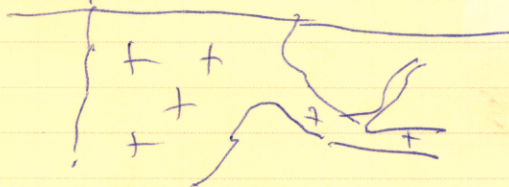

markers - massive flows & trachyte tuffs
Aeg Py latites - flows, fragmentals, tuffs
And - flows, debris flows, local tuff
2-4m clasts

66 Gold zone - controlled by sinuous fault @ Rainbow Flt

MBX stock gets smaller downward

Altn Potassic core + magnetite

salphedes Ba (local) qtz py magnetite - all gold brg
avg 5%+

Ppy Seesoy
(Dec 89 Spokane)

Rainbow dyke

unalt \rightarrow Kspen altered

Kspen overprint EDB

or Kspen over chl
66 zone

Core of MBx

Bio + Kspen

Albite pipe - LG

Sulphides

Cold-^{on} outside grain boundaries of py

Gold floats with Qpg -
Expect 85% recovery

• $3\frac{1}{2}\%$ Cu / .025 g/ft ore
