Mr. D'Arcy Morrow, President  
Suzie Mining Explorations Ltd.  
502 409 Granville Street  
Vancouver, B.C.  
V6C 1T2

Dear Sir:

I have reviewed the results of exploration to date on Suzie property on Osilinka River and Wasi Creek. The discovery of last fall which has been called the Bullseye Showing has been well tested by core drilling. While there were some intersections of interesting silver, lead and zinc values, the dimensions are small and the showing by itself is not sufficient to support a mining operation. The geophysical survey completed by Ager and Associates dated January 10, 1978, indicates a number of additional areas of potential which require direct tests to determine their value. The following report sets these in order of priority with a recommended program for the 1978 season. Cost estimates include camp costs but no allowance is made for Vancouver office costs.

Yours very truly

Keith C. Fahrni, P.Eng.
