Box 300

Doon Nelson BC

VOC-180

Dear Luis:

Enclosed is a small bag of rock samples, plus assays and I understand the rock is almost pure calcite.

I don't seem to find out its value and where its is used, although have heard (rumor only) that paper mills and paint company's use calcite a lot. I have tried to find out more info as to demand and value through limestone and rock and sample suppliers and they seemed reluctant to divulge any info.

Any info you could supply re worth would be greatly appreciated. I think I have found about 1 to 2 million tons of pure calcite and for you Doon Nelson BC.

If it is of any value and demand enough to put it in production, and improve the economy and unemployment in this area.

Thanking You
for any information
Robert Keyes
