

MAP OF  
**SKIDEGATE - SUNRISE GROUP**  
SKIDEGATE, QUEEN CHARLOTTE ISLANDS

1 Inch = 40 Ft.

December 1st 1930

This map compiled from survey by P.L.S. of 50' and 100' Levels and Brunton survey, by me, of 25' Level and surface. Level of Gordon Shaft taken from old maps. The whole thing an approximation, probably fairly accurate, and should be supplemented by transit survey when mine unwatered.
