GENL #227 26 NOV 1984 TRADER RESOURCE CORP. (TRR-V)

BULK TONNAGE GOLD - Trader Resource Corp. president R.A. Dickinson has reported the first phase diamond drilling in the area of the Kim bulk-tonnage gold deposit has increased reserves to 1,100,000 tons grading 0.072 oz. gold/t. This includes a central zone of 452,000 tons grading 0.104 oz. gold/t. Work is continuing on the property on Banks Island, 70 miles south of Prince Rupert B.C. Ore reserves were calculated for Trader by International Geosystems Corporation and are given a 95% confidence level.

As proven by the recent program, the Kim deposit is open to expansion in all directions. Very large scale bulk-tonnage gold reserves are expected to be delineated by further drilling. The Kim deposit is one of 10 known gold deposits within the boundaries of Trader's Yellow Giant property.
