

PICTO A TC 1/66

View looking up the Tchalhasan
River showing main exposure prior
to 1966 trenching. Material at
water level contains visible
molybdenite and chalcopyrite.

Photo #1

Converted "Husky" aircraft
supplying Hepler Lake camp

Photo #2

Camp end of Helicopter
airlift originating
at barge in Indian Bay

Photo #3

Looking southerly across
Englishman Slough
which thoroughly conceals
the Englishman Zone
-This condition is
typical of Banks Island
