 News Release

Golden Band Resources Inc. (GBN)

Mr R. Netolitzky reports:

SW
 The initial phase of exploration has been completed on the American Ore - Golden Band/Delaware Resources Iskut River joint venture. *104B076, 088*

Existing trenches were cleared and resampled on the Hemlo 16 claim, for which some of the analytical results have been received; the highlights of which are tabulated below for trenches 1a and 1B:

Location	Sample No.	Width (m)	Au ppbpct	Cu
Trench 1a	5022	0.6	540	
	5023	0.4	1350	
	5024	0.3	2000	
	5025	0.8	5000	
	5026	0.5	100	
	5027	0.4	100	

100 meters along strike

Trench	Sample No.	Width (m)	Pb pct	Zn pct	Ag opt	Au opt
Trench 1b	5028	1.6				
	5029	0.5				2.9
	5030	0.2				4.04
	5031	0.6				4.02
	5032	0.5				
	5033	0.9				95
	5034	0.5				8400 8.10
	5035	0.5				10000 8.32
	5036	1.7				860
	5037	0.4				180

Trench	Sample No.	Width (m)	Pb pct	Zn pct	Ag opt	Au opt	
Trench 1a	5023	0.4				1.40	
	5024	0.3		8.98		5.95	
	5025	0.8				15.92	
Trench 1b	5029	0.5		3.05		2.18	
	5030	0.2		3.12		2.38	
	5031	0.6		1.15		8.62	
	5032	0.5				2.55	
	5034	0.5		1.72	5.25		7.44
	5035	0.5		3.90	12.02		28.81
	5035	0.5					Au - 0.952

Two separate chip samples, spaced at 2 meters along strike, were taken across trench 1b. Trench 1a and 1b are about 30 meters apart.

An initial 6-hole drill program has commenced to test the trench 1a and 1b area and a related gold-in-soil geochemical anomaly which extends for about 500 meters
