

LEGEND

- Inferred lithologic trend
- Self potential anomaly
- Indicated fault - major
- Indicated fault - minor
- Vein fault (?)
- Highly fractured bedrock indicated
- Swamp
- Weak to moderate negative resistivity residual
- Moderate to strong negative resistivity residual
- Weak induced polarization residual
- Moderate induced polarization residual
- Strong induced polarization residual
- Geochemical data of residual or original data
Geochemical high, with symbol for high metal present
Cu - Copper, Zn - Zinc, Pb - Lead
- Gravity Anomalies
