

- LEGEND**
- 11 Diorite
  - 10 Biotite Diorite
  - 9 Lamprophyre
  - 8 Metabasalt. Coarse grained pillowed and massive flows. Minor tuff and fragmental rocks.
  - 7 Banded to Massive Pyrite and Chalcopyrite. Quartz gangue, minor sphalerite lenses.
  - 6 Cupriforous Pyrite and Pyrrhotite in Metabasaltic Tuff and Metapelitic Sedimentary Rocks
  - 5 Intercalated Metabasaltic Tuff and Metapelitic Sedimentary Rocks
  - 4 Metabasaltic Fragmental Rocks Agglomerate and Tectonic Breccia
  - 3 Metabasaltic Tuff, Agglomerate, Lava Toes, Pillowed Flows
  - 2 Metabasaltic Tuff with minor Pillows
  - 1 Metabasalt Pillow Lava, Lava Tubes. Fine Grained to Porphyritic.

- SYMBOLS**
- Geological Contact Definite, Inferred
  - ~~~~~ Fault
  - ↗ Attitude of Foliation
  - Diamond Drill Hole
  - ↔ Overturned Anticline (Arrow indicates direction of plunge)
- ROCK SAMPLES**
- ⊗..... Multielement Geochemistry
  - ⬡..... Mineralogy Research
  - △..... Copper Geochemistry (values in PPM Copper)
- ALTERATION**
- ⊘..... Chloritization
  - ⊙..... Silicification
  - ⊙..... Sulfide Impregnation
