

LEGEND

- CRETACEOUS INTRUSIVE ROCKS**
 - quartz monzonitic intrusive rocks
 - granite, alkali feldspar granite, intrusive rocks
- JURASSIC LABERGE GROUP**
 - conglomerate, coarse clastic sedimentary rocks
- TO MIDDLE JURASSIC STRATA**
 - andesitic volcanic rocks
 - conglomerate, coarse clastic sedimentary rocks
- JURASSIC LABERGE GROUP**
 - TRIMBLETON FORMATION conglomerate, coarse clastic sedimentary rocks
 - TRIMBLETON Fm. argillite, greywacke, siltstone, conglomeratic turbidites
 - undivided sedimentary rocks
- ANILIN FORMATION argillite, greywacke, siltstone, conglomeratic turbidites**
- TRIASSIC TO JURASSIC INTRUSIVE ROCKS**
 - intrusive rocks, undivided
- UPPER TRIASSIC TO LOWER JURASSIC STRATA**
 - conglomerate, coarse clastic sedimentary rocks
- LATE TRIASSIC STUBHINI PLUTONIC SUITE**
 - monzonitic to gabbroic intrusive rocks
- UPPER TRIASSIC STUBHINI GROUP**
 - conglomerate, coarse clastic sedimentary rocks
 - TRIMBLETON FORMATION limestone, dolomite
 - basaltic volcanic rocks
 - volcaniclastic rocks
- DEVONIAN TO MID TRIASSIC BOUNDARY RANGES METAMORPHIC SUITE**
 - greenstone, green schist, metamorphic rocks
 - limestone, marble, calcareous sedimentary rocks
 - basaltic volcanic rocks
 - metamorphic rocks, undivided

- Anomalous Soil (Au, ppb; Other elements, ppm)
- ◆ Mineralized Flat
- ★ Mineralized Outcrop
- ▲ Steam Geotherm Analysis (Au, ppb; Other elements, ppm)
- Tectonics
- Mineral Claims
- NAD83 grid
- Induced Polarization (IP) Anomaly
- Ground Grid

- GEOLOGICAL FEATURES**
- Geological Contact
 - Fault
 - Fault Contact
 - Thrust Fault Contact
 - Quaternary

**MARKSMEN RESOURCES
GOLDEN EAGLE PROJECT**

Alluvial Mining District, British Columbia
WFO 104815
COMPILATION MAP
Scale 1:50,000

Date: June 2002 Compiled by: P. McMillan, P. Desjardins
