TEESHIN RESOURCES LTD. (TEE-V)

HOLE NO.	INTERSECTION BOULDER EXTENSION	INTERSECTION PARALLEL ZONE	DISTANCE FROM END OF BOULDER OREBODY
D89-1	0.475 oz.Au/ton 2.3 feet .149 oz.Au/ton 3.3 feet	0.113 oz.Au/t 3.5 feet	880 feet
D89-2	Drilled vertical from D89-1 - did not intersect structure		880 feet
D89-3		.077 oz.Au/t 1.3 feet	1,000 feet
D89-4		.037 oz.Au/t 2.6 feet	1,500 feet
D89-5	.63 oz.Au/ton 3.3 feet		1,000 feet
D89-6	1.5 oz.Au/ton 6.5 feet		800 feet

Hole D89-6 was previously reported as 1.7 oz.gold/ton over 5.0 feet

-----  
DOMES MOUNTAIN DRILL RESULTS - Stafford Kelley,

president, reports Teeshin Resources Ltd. has received additional drill results from the Dome Mountain project near Smithers, B.C. Canadian United Minerals holds a 33.3% interest. Teeshin has a 66.6% interest and Total Energold Corp. has a 15% net profits interest.

The drill program has demonstrated the easterly and down-dip extension of the Boulder ore zone which presently contains 300,000 tons grading 0.355 oz.gold/ton and 2.34 oz./silver/ton. New intersections have encountered ore-grade material up to 330 feet below the easterly end of the present ore body and 1,000 feet along the easterly extension of the zone. Six holes were drilled in the easterly extension of the Boulder zone and a parallel structure was discovered to the east. See results in table above. (SEE GCNL No. 2, 3Jan90, P.1 FOR OTHER DETAILS)

Drilling under the west end of the Boulder zone produced the following results:

D89-8 0.47 oz.gold/ton over 15.25 ft  
D89-10 0.159 oz.gold/ton over 2.0 ft  
D89-13 .148 oz.gold/ton over 1.6 ft  
D89-14 .49 oz.gold/ton over 2.0 ft  
D89-7, D89-9, D89-11, D89-12 had sub-economic values

Further drilling will be required in this area to define additional reserves. Drilling resumed on 10Jan90 and is concentrating on the easterly extension of the Boulder zone.
