# 97 BEV

The Bev claim is an 18 unit mineral claim north and adjacent to the Eureka. Easily accessed by logging roads. This claim has very little written history, but had it's own townsite...The Ghost Camp. The claim also had approximately 7 Crown Grants on it, but have been absorbed by the larger 4 post claim. The claim is host to one of the largest known deposits of sculpture grade soapstone and Commercial Grade Talc in Western North America. This ultramafic zone has dozens of quartz veins running parallel and perpendicular to the talc, with a number of anomalous metals in different areas of the property. Some assays include chrome, copper, Ag 13oz/t, Zn 7.5% and some values in Au with a potential for Platinum Group Elements.

## INFORMATION FOR OUR COMMERCIAL TALC CUSTOMERS

### RAW ROCK (RUN of the MINE)

### WHOLE ROCK ICP ANALYSIS (TALC #1)

|                                |     |       |
|--------------------------------|-----|-------|
| SiO <sub>2</sub>               | %   | 35.27 |
