①

June 30, 1992.

Mr. John Brock:

Dear Sir:

Further to our telephone conversation, enclosed herewith you will find data of information re our property. However, I would strongly advise a personal view of the property by yourself. There are 3 (three) discoveries on the property not mentioned in the brief, and also the Moly Show which Places just gave us back, is not included in this information. There are over 150 drill holes on the Carmi Moly and I have all the core and information available for you; at present I have no copies of this material so would not want the originals lost in the mail. I'm sure you understand. There are also engineers reports & maps etc. available which will be provided to you when you come to view the property. Please be prepared to spend at least 2 days and advise me a day or two in advance of your arrival here.

There is a claim map enclosed and everything outlined in yellow is ours.

Please feel free to contact any of the geologists and engineers on the enclosed list.

(over)

We discussed the Falconbridge contract.
Herewith is one of their proposals.

Thank you for your kind attention and
consideration to the enclosed. After your
personal study of the enclosed data,
would you be so kind as to inform
us of your opinion and just when
you would be available to come here.
I am certainly looking forward to seeing
you.

As our telephone conversation was so
brief, now that you have the enclosed
info, feel free to contact me by phone
763-7944 or if you wish to Fax
please use our accountants No. 604-861-6886.

We are looking for a Major - Junior or
a Junior - Major to really put their heart
into the property to both our advantage.
I present to your company the material
and from what I've been informed,
you are a go-getter! Again I mention
I'm sure with your ability and record
we can really make it.

P.S: Our property contains gold, silver,
lead, zinc, moly, copper, etc. and we
have reports to prove all this.

Yours truly.
