

# PROPERTY EXAMINATION REPORT

COMPANY: ..... COLUMBIA GOLD MINES LTD. ....

DATE: JULY 14/93 EXAMINED BY: [Signature] 520297

PROPERTY NAME: RAVEN

COMMODITY: Au

OVERVIEW:

N.T.S.: 92-J-9

LOCATION: 15 KM S.W. of Lillooet

ACCESS: - road access from Lillooet, steep terrain!

OWNERSHIP: - Reese River Res.

CLAIM STATUS: - 1 claim - 20 units

HISTORY: - New find in 1992, discovery of py, Aspy & Pb float in new logging road. float assayed .36 g/T Au. Follow-up by geology, trenching + drilling. 4 target areas.

DISTRICT ACTIVITY:

- low level of activity at Bialore Camp; little reported activity this year.

TERMS REQUESTED:

UNKNOWN

CAPSULIZED GEOLOGY:

- Carbonate altered greenstone of Bridge River Group interbedded with fresh argillite + chert.
- carbonate zone (Listwanit) contains variable gts veining.

DEPOSIT TYPE: - Qty stockwork in Listwanit  
- Gold with Aspy, Py, Pb, Zn

EXPLORATION TARGET:

- geology target of Cu, Au, As anomaly
- Zones A, B, C & D identified.
- Zone A - 2 holes - no sig values, did not hit!
- Zone B - too steep.
- Zone C - 2 holes - no hits, no zone.
- Zone D - surface 0.84 g/T Au / 11.5 ft. - 4 holes hit zone with best hole 0.51 g/T Au over 5 feet

SAMPLING RESULTS: - Reported missed effort with coarse gold  
- Chris Sampson unhappy with gold values in drilling program.

CONCLUSION and RECOMMENDATIONS:

- scanning of drill hole results indicates narrow erratic gold hits with no associated gold bearing alteration we should hope for. wall rock is dead!
- Small land position, steep terrain, little gold!

ACTION TAKEN:

No recommendation here!
