Subject: Krof (North Fork) Property - VMS

WTR

Hi John,

I am enclosing some information on the Krof VMS property (formerly North Fork property) that I own 50/50 with Gerry Carlson (KGE Management Ltd.). We recently staked 20 Units over the prospect with the discovery showing at the center. Access is via logging roads on the North Fork of Cogburn Creek, very near the Bear Landing log sorting grounds on the east shore of Harrison Lake, BC. The Krof property is available for option.

Minnova conducted two drill programs on the Krof (1988 & 1989), under the direction of Colin Burge.

Attached is the Krof Minfile write-up and some site photographs taken this past Thursday.

An independent Summary Review Report on Krof is being prepared by David Makepeace, PEng. The report will be available within a week.

The GSB is presently active in the Cogburn Creek area doing a regional mapping program in the ultramafics (Robert Pinsent and Chris Ash). The "Cogburn" ultramafic property that Gerry and I also own, is located 8 kilometers south of the Krof and is under option to Leader Mining International Inc.

I plan to be in Denver and Reno the next week so if you have any questions regarding Krof do not hesitate to contact Gerry Carlson (604.688.0833) or Tom Schroeter (604.660.2812).

Regards, John
(604.536.8356)
