Topely Richfield.

- massive sulph caught in a vein

Atinon, Arseno

veins - gt vein tetra - chales - off to side.

- from near

- some Au number in.

- Stratigraph - not 100% sure.

- rocks at Topely -

Equity vein situation ?? another than Esker

In Hazelton

- some rocks look felsic, all in low water.

- when then DDH don't see much.

Jim Hunter.

- Golden Eagle

- under ground - zones in depth - could be bedded

- no body pushed. Pb - Zn.

- 500 oz. Ag -

- 8 gms at Topely - good Ag values.

- shaft, no drifts.

- 2 days off highway at Gransell.

reput of net.

- 9-10 after act in last year

- still here 20 more.

- best. Au

Sea Gold - Claims. New and the mouth

- 160 cents.

- gross costs - , target

trends → 1991 when they showed stopped

- big slab 4-5' across

- Grab 5-10 oz Au. <sup>quartz -</sup>

- a bit of jasper in creek

- not up grade

- SW of Newmont label - NE of Esley creek.

- Age of 1x not right.

- a lot of 1st in pack, some enthusiasm

- skarn?

- float - looks like a vein - not high level - apart to

- McClymont. creek NE. 2/ ad

- Toz / 3-4m. on / Gulf International

- drill

Pemicon.

\$25,000 -

complete dump.

1 hour of peace later

20 minutes and Esley.

- 3 there this summer.

There is skarn to NE end of group.

Sediment dk agalite could be altered.

vein north thru Esley.

dis, horfels around,

PROJECT OVERVIEW:

The McKenna - McCann Property is located 2 km northeast of Schreiber in Prisk Township (- 30 km north of Lake Superior and -100 km NW of Kenora), Ontario. The property is owned by RK Explorations Ltd. of which Sam Kravchik is president. The property is underlain by pillowed metabasaltic flow rock and minor iron formation that have been intruded by metagabbro and metachert dykes, lamprophyre dykes and small QFP porphyry stocks. Several major lineaments (Big Duck Creek - Kings Lake Lineament, Hollander Lake lineament) traverse the area. Gold bearing quartz veins occupy shear

PROPERTY DESCRIPTION:

RK Explorations hold 200 claims (units) covering an area of 2 x 6 km. The property is located approximately 2 km northeast of Schreiber in Prisk Township, Ontario. Access is by 4x4 road N and E from Schreiber also by foot from Hwy 17. During the winter the prospect can be accessed via snow mobile in approximately 20 minutes from the main road.

HISTORY:

Historical information is sketchy. Sam Kravchik procured a 1947 government report from which he has reproduced some underground and surface maps. Two brothers died 13 years ago trying to de-water the underground workings. There is also a report that someone recovered \$100,000 of gold via small surface operation. No details on how much
