Navarre Resources Corporation is actively pursuing several potentially large tonnage Gold, Silver, Lead, Zinc prospects in the Golden Triangle- Stikine Arch area of British Columbia. The Silver Crown Project (Strike claims) which will be drilled by Navarre this summer and the Ice claims which are currently under review by a number of Major mining companies.

SILVER CROWN PROJECT - Strike claims

Preliminary indications strongly suggest that these claims have the potential to host a target of considerable size and grade. Management is very excited about the prospects for this project. Financing for the 1991 drill program is currently being negotiated.

Location & Access

- Located 18 miles north of Stewart B.C. in the Stikine Arch/ Golden Triangle area of British Columbia.
- Accessible by road. (One hours driving time from Stewart B.C.)
- Five (5) miles from existing milling infrastructure. (Westmin's Premier Gold Mine)
- Workable gentle topography

Geology

- Polymetallic complex Quartz Stockwork, traced for in excess of 1 mile on surface and open to the north.
- Surface assays range up to
  - 2.33 oz./ ton Gold
  - 429 oz./ ton Silver
- Weighted average Lead/Zinc 7% over 1 mile strike length and open.
- Appreciable grades of copper and tungsten.
- Geophysical anomaly in excess of 2200 feet north/south and open to the north and greater than of 900 feet east/west.
