Dear Lorne:

Re: Vent Property

Thank you for giving us the opportunity to review both technical data and rocks from several of your massive sulphide projects in northern BC.

The Vent definitely warrants a visit this summer if it is still available. It appears that this large property requires a recon targeting program in order to define drill targets. We like the environment but realize the all important high grade mineralization has not been uncovered so far. Lady Luck in the prospecting department is probably needed followed by an aggressive program. It might be our time to find the high grade. See you this summer.

Your data has been forwarded by courier to Thomas Drilling.

Yours truly,

JOHN S. BROCK LTD
