

# PROPERTY EXAMINATION REPORT

COMPANY: AMERICAN BUZZON  
DATE: Sept 8/93 EXAMINED BY: [Signature] 520912

PROPERTY NAME: RDN  
COMMODITY: Au, base metals  
OVERVIEW:

N.T.S.: 104-B-15  
LOCATION: - 40 km NW of Eskey Ck, 24 km W-1  
Bob Quinn.

ACCESS: - Helicopter

OWNERSHIP: - Equity Engineering 1/3, Neil Debock 1/3,  
Rocky? 1/3

CLAIM STATUS: - 40 units

HISTORY: - optioned by Noranda, who mapped, sampled,  
gridded, drilled several holes. - Noranda's  
focus was on structural gold in felsic  
volcs to north of RDN

DISTRICT ACTIVITY: - Noranda claims surround RDN  
and are available for option. (GOS)

TERMS REQUESTED:  
- Noranda ds - spend \$750,000 to earn 50%  
- Noranda to participate or reduce to  
20% NSR.  
- RDN - fund \$35,000 work program,  
- spend → 1/2 million to earn 70-100%

## CAPSULIZED GEOLOGY:

Tertiary felsic volcanics along with felsic  
porphyry overlain by sediment + mafic volcs. prior  
work focused on its veins in porphyry. little  
work on stratigraphic horizon that could  
host another Eskey Ck. -

DEPOSIT TYPE: - Not determined

## EXPLORATION TARGET:

- Target is contact of felsic volcs + sediment  
which was not prospected in detail or covered by  
geotem grid. Recent silt sampling has outlined  
anomalous gold silt channels, prospect. Contact is  
topo low, no rhodonite showing at contact.

SAMPLING RESULTS: - high silts (Au, Cu, Pb, Zn) drain  
contact area, not followed up. - (low grade!)

## CONCLUSION and RECOMMENDATIONS:

- Good route play for attractive target. Needs  
more enticement! - float, geotem, etc.

## ACTION TAKEN:

DN HOLD, KEEP IN TOUCH.
