Marvin Sherman L.P. Grains

Atlin Area 104N/12

Visible gold, locally good assays over narrow widths, over 1000' on strike.

Old workings indicate parallel structures.

Most of area is above timberline

Seems a good area to try soil <sup>gold</sup> geochemistry -  
greenstones - could be similar geology to  
that around Carolyn Mines.

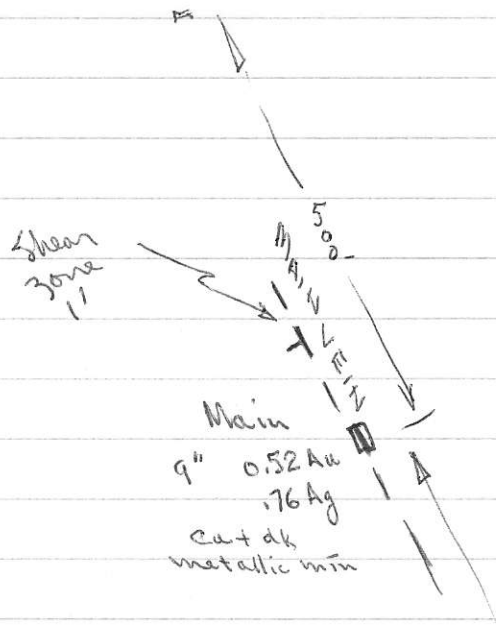

P.S. WHITE' 50/50

20,000 down.

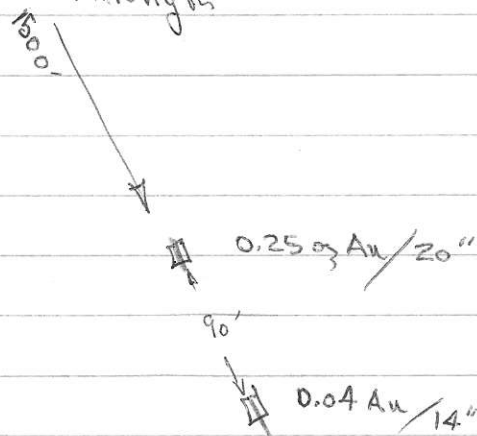

Clean cuts - M. Clout - live tunnels

$\square$  .02  
 $\square$  .01  
 10 Tranches  $\square$  .01 } low Au values.

$\approx$  1 chm. length

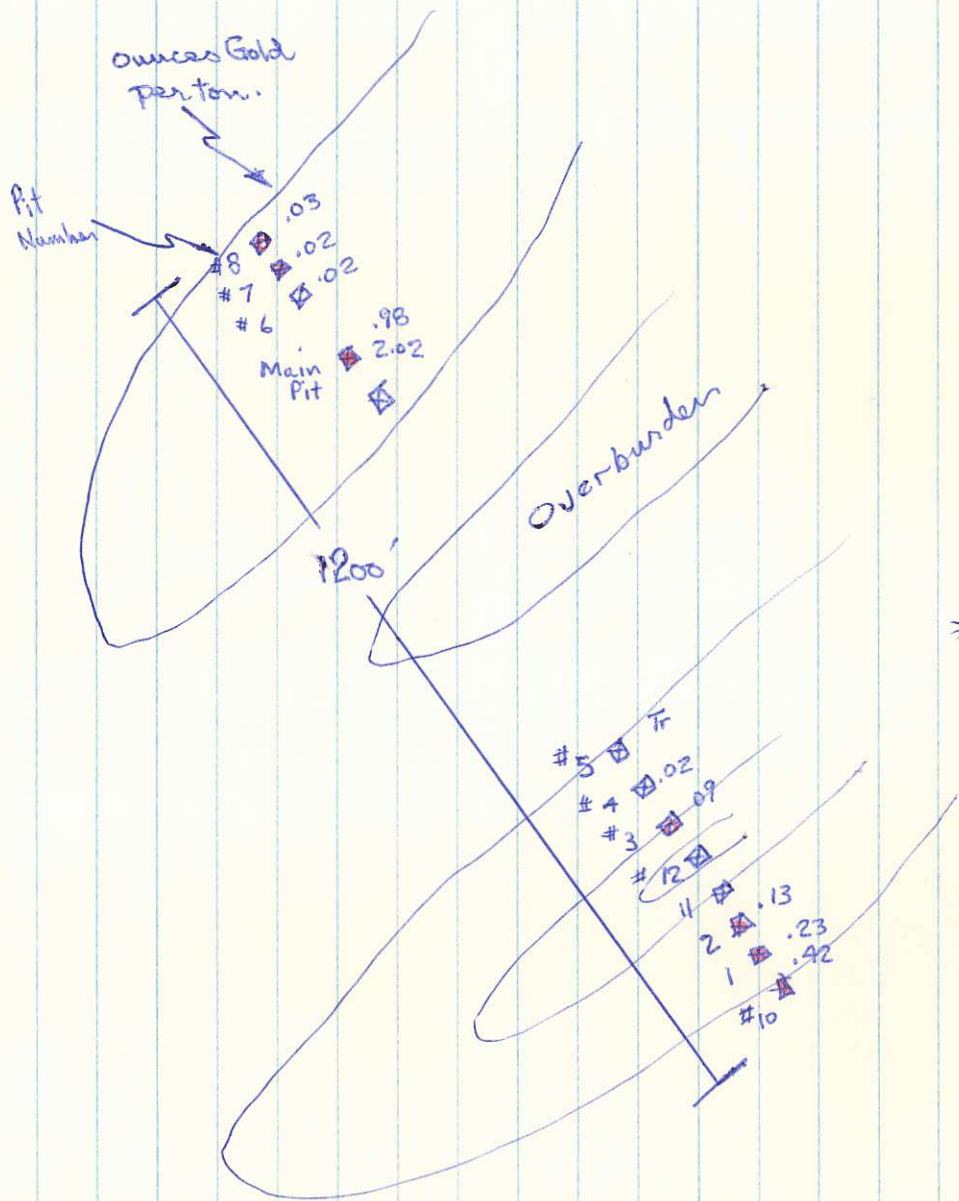

Note probably talking about  
 same area as that shown on  
 Transcontinental Resources Map

Sketch from descriptions in  
 1950 Minister of Mines
