Iva Fern Mine

Box 390 Nelson, B.C.
January 30th 1952

Dr. F. C. Buckland
1403 Royal Bank Building
Vancouver, B.C.

Dear Frank;

Am forwarding to you in today's mail three maps of the Iva Fern Property which I have compiled from information gathered from the Mining Recorder's office and the B.C. Dep't. of Mines records.

The descriptive notes and assays pencilled in on the 40 scale plan and section of the workings were obtained from B.T. O'Grady's report in the 1928 report of the B.C. Minister of Mines. We have been able to obtain little or no information as to the results of the work done by the C.M. & S. in 1929 and '30. Also have not been able to find out the location of the lower tunnel which O'Grady mentions in his report. It was not shown on the photostat of the C.M. & S. map which we obtained from the Dep't. of Mines. Possibly there will be some additional information on the maps which Victoria is sending you.

After compiling the 200 scale claim map it occurred to me that the No. 1 vein seems to strike quite close to the eastern boundary of the group and it might be advisable to stake a group of claims south from the boundary of the Standard to cover the ground open to the east of the group. This would involve the staking of three or possibly four claims.

Yours very truly,

R.P. Jordan
