Dear Sir:

Relevant to our telephone conversation of this morning I am forwarding you a copy of the reports and maps on the Silver Horde & Silver Bell Crown Grants located in the Monashee Mountains.

I would much appreciate that when assessing this information you would zerox an extra copy for me and return it along with the original copy as quickly as possible.

Should you be unable to maintain contact with me as regards these claims you may contact Douglas Wilmot located on Hobson Road in the city of Kelowna, Phone 764-4220. Mr. Wilmot, a geologist, has authority to deal these claims on behalf of the owner.

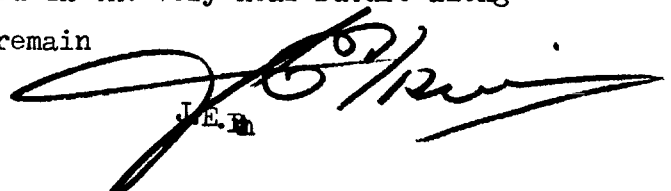

I note that you are pursuing some exploration in the Yellowknife area and have an agreement with Echo Bay as to a couple of properties. Should you wish to expand your program I can bring to your attention an additional two properties, each with gold showings and reports available to substantiate their merit for exploitation and development. In both of these properties I have associates who must be consulted before finalization of any deal. > \*

Reports on the two Yellowknife properties can be made available for examination and copying but I do not choose to mail them or ship by courier. yes.

Field examination could be made by helicopter as early as mid-May and by fixed wing, float equipped aircraft probably by June 7th. The property adjoining Terra, s "Bullmoose Property" to the north could probably be visited by use of the Terra Company Airstrip and aircraft on wheels in early May.

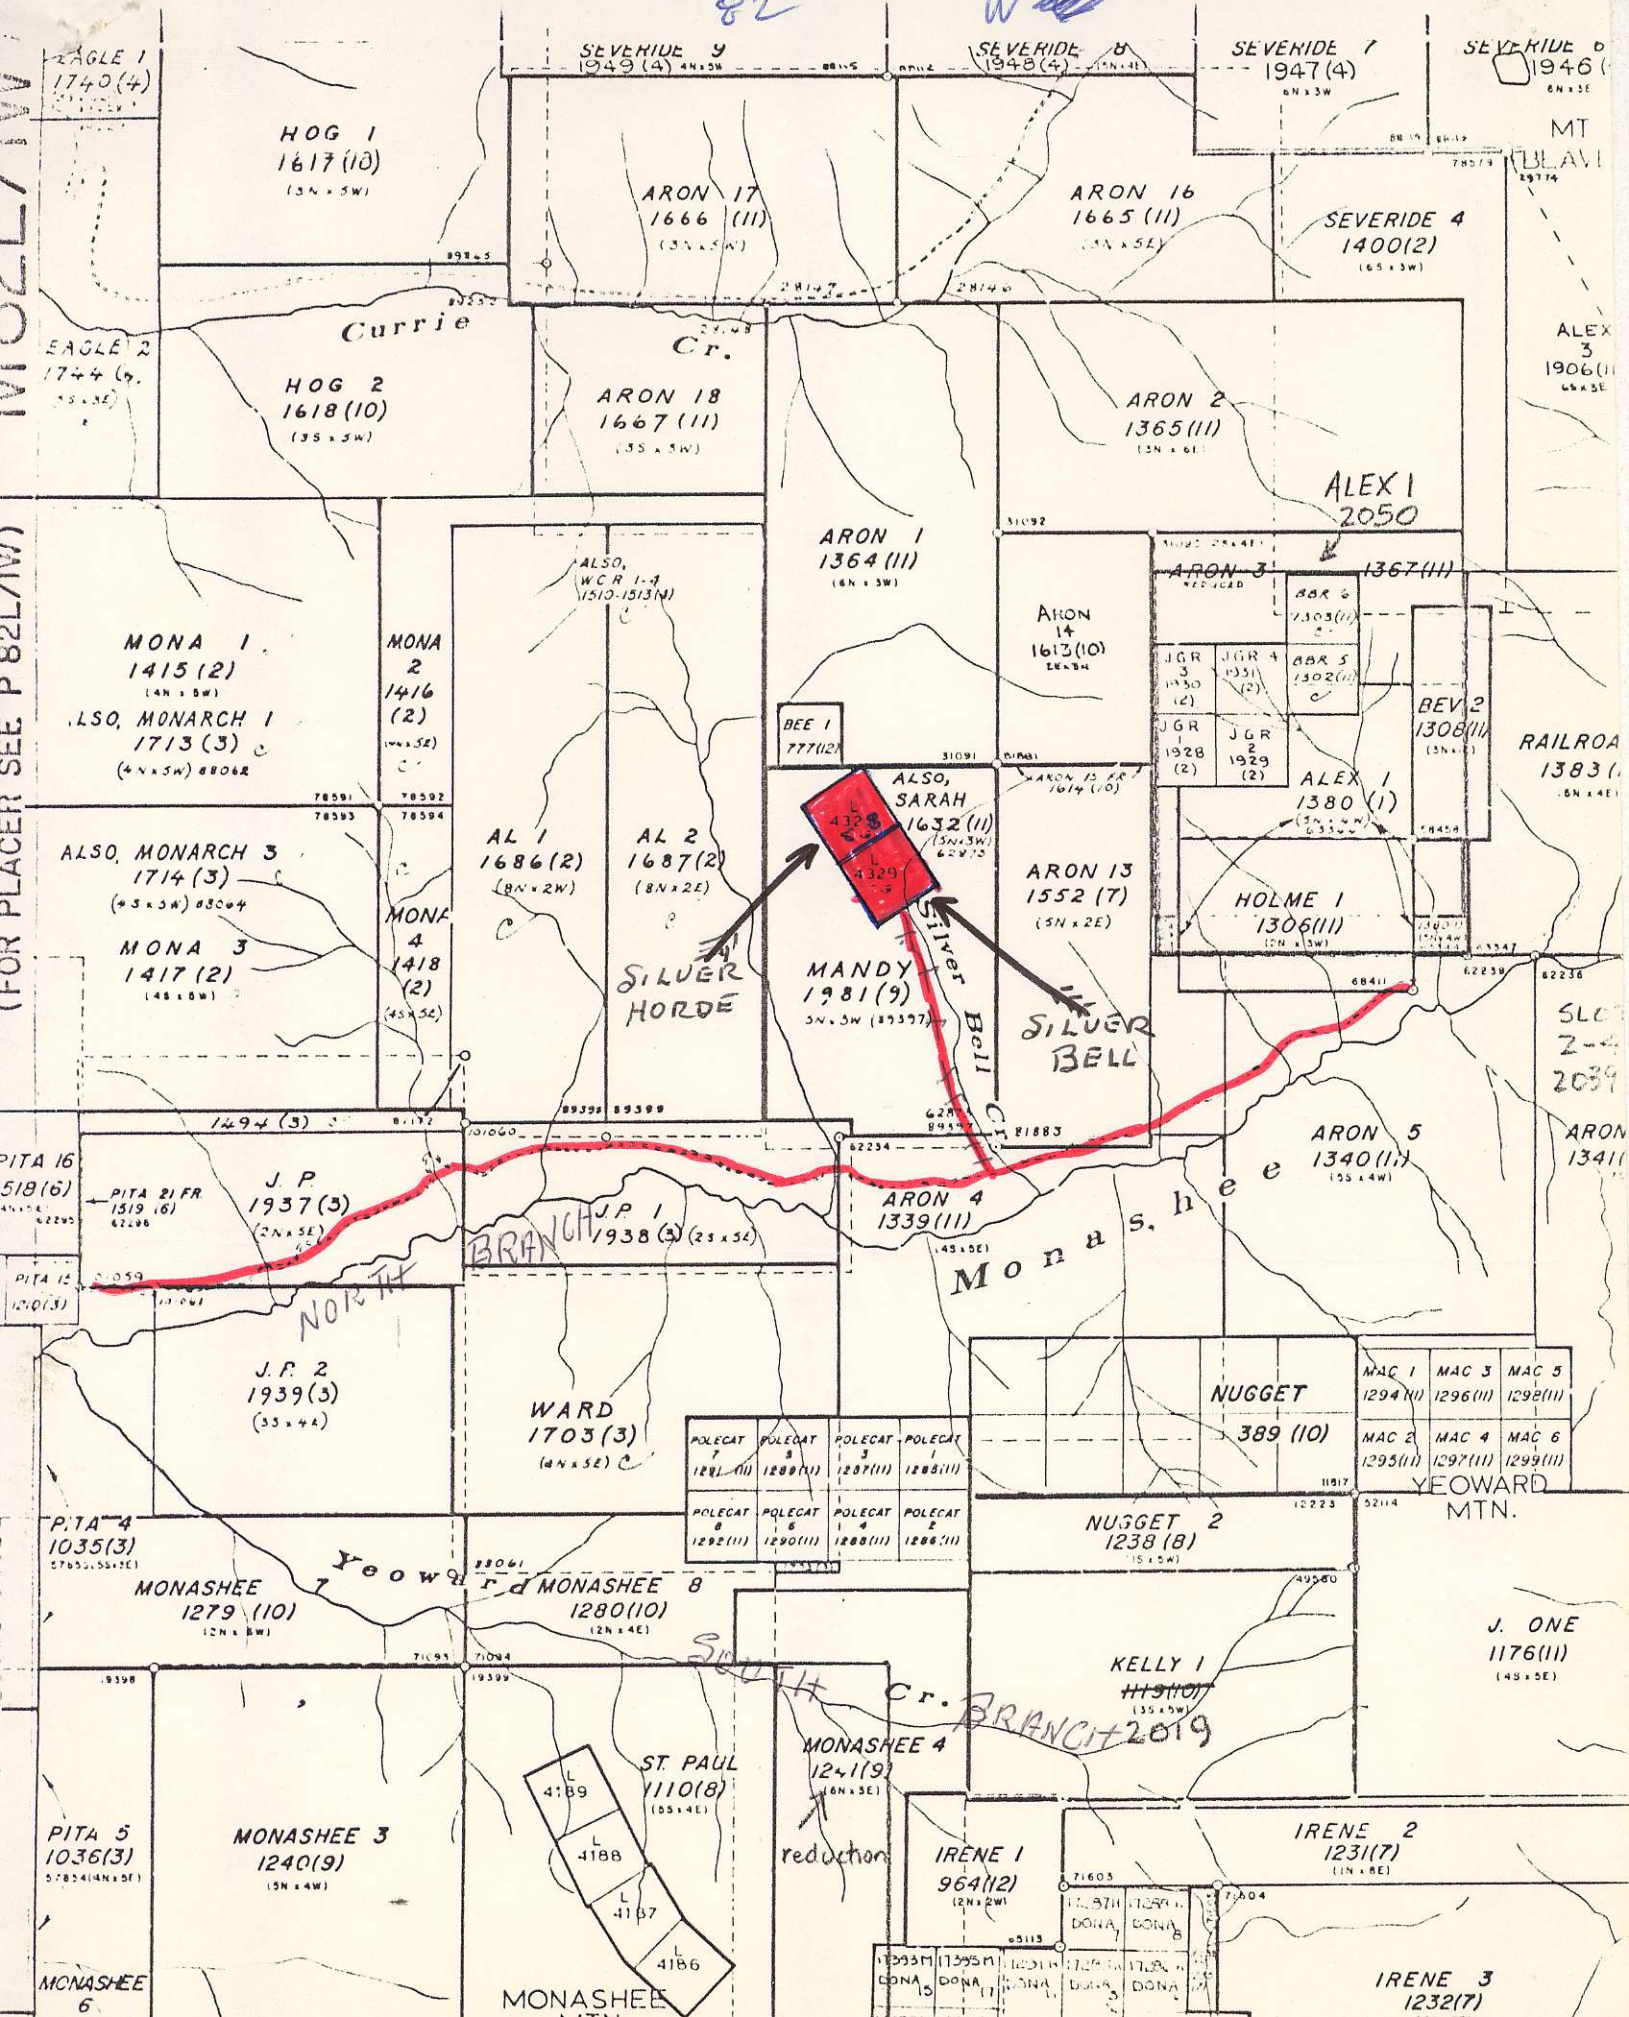

In vending these claims the asking price is a nominal ten thousand dollars as the initial payment in each case. Arrangements for following payments will be contingent on amounts to be expended on development of the property, retained interest, buy-out clause, etc. etc.

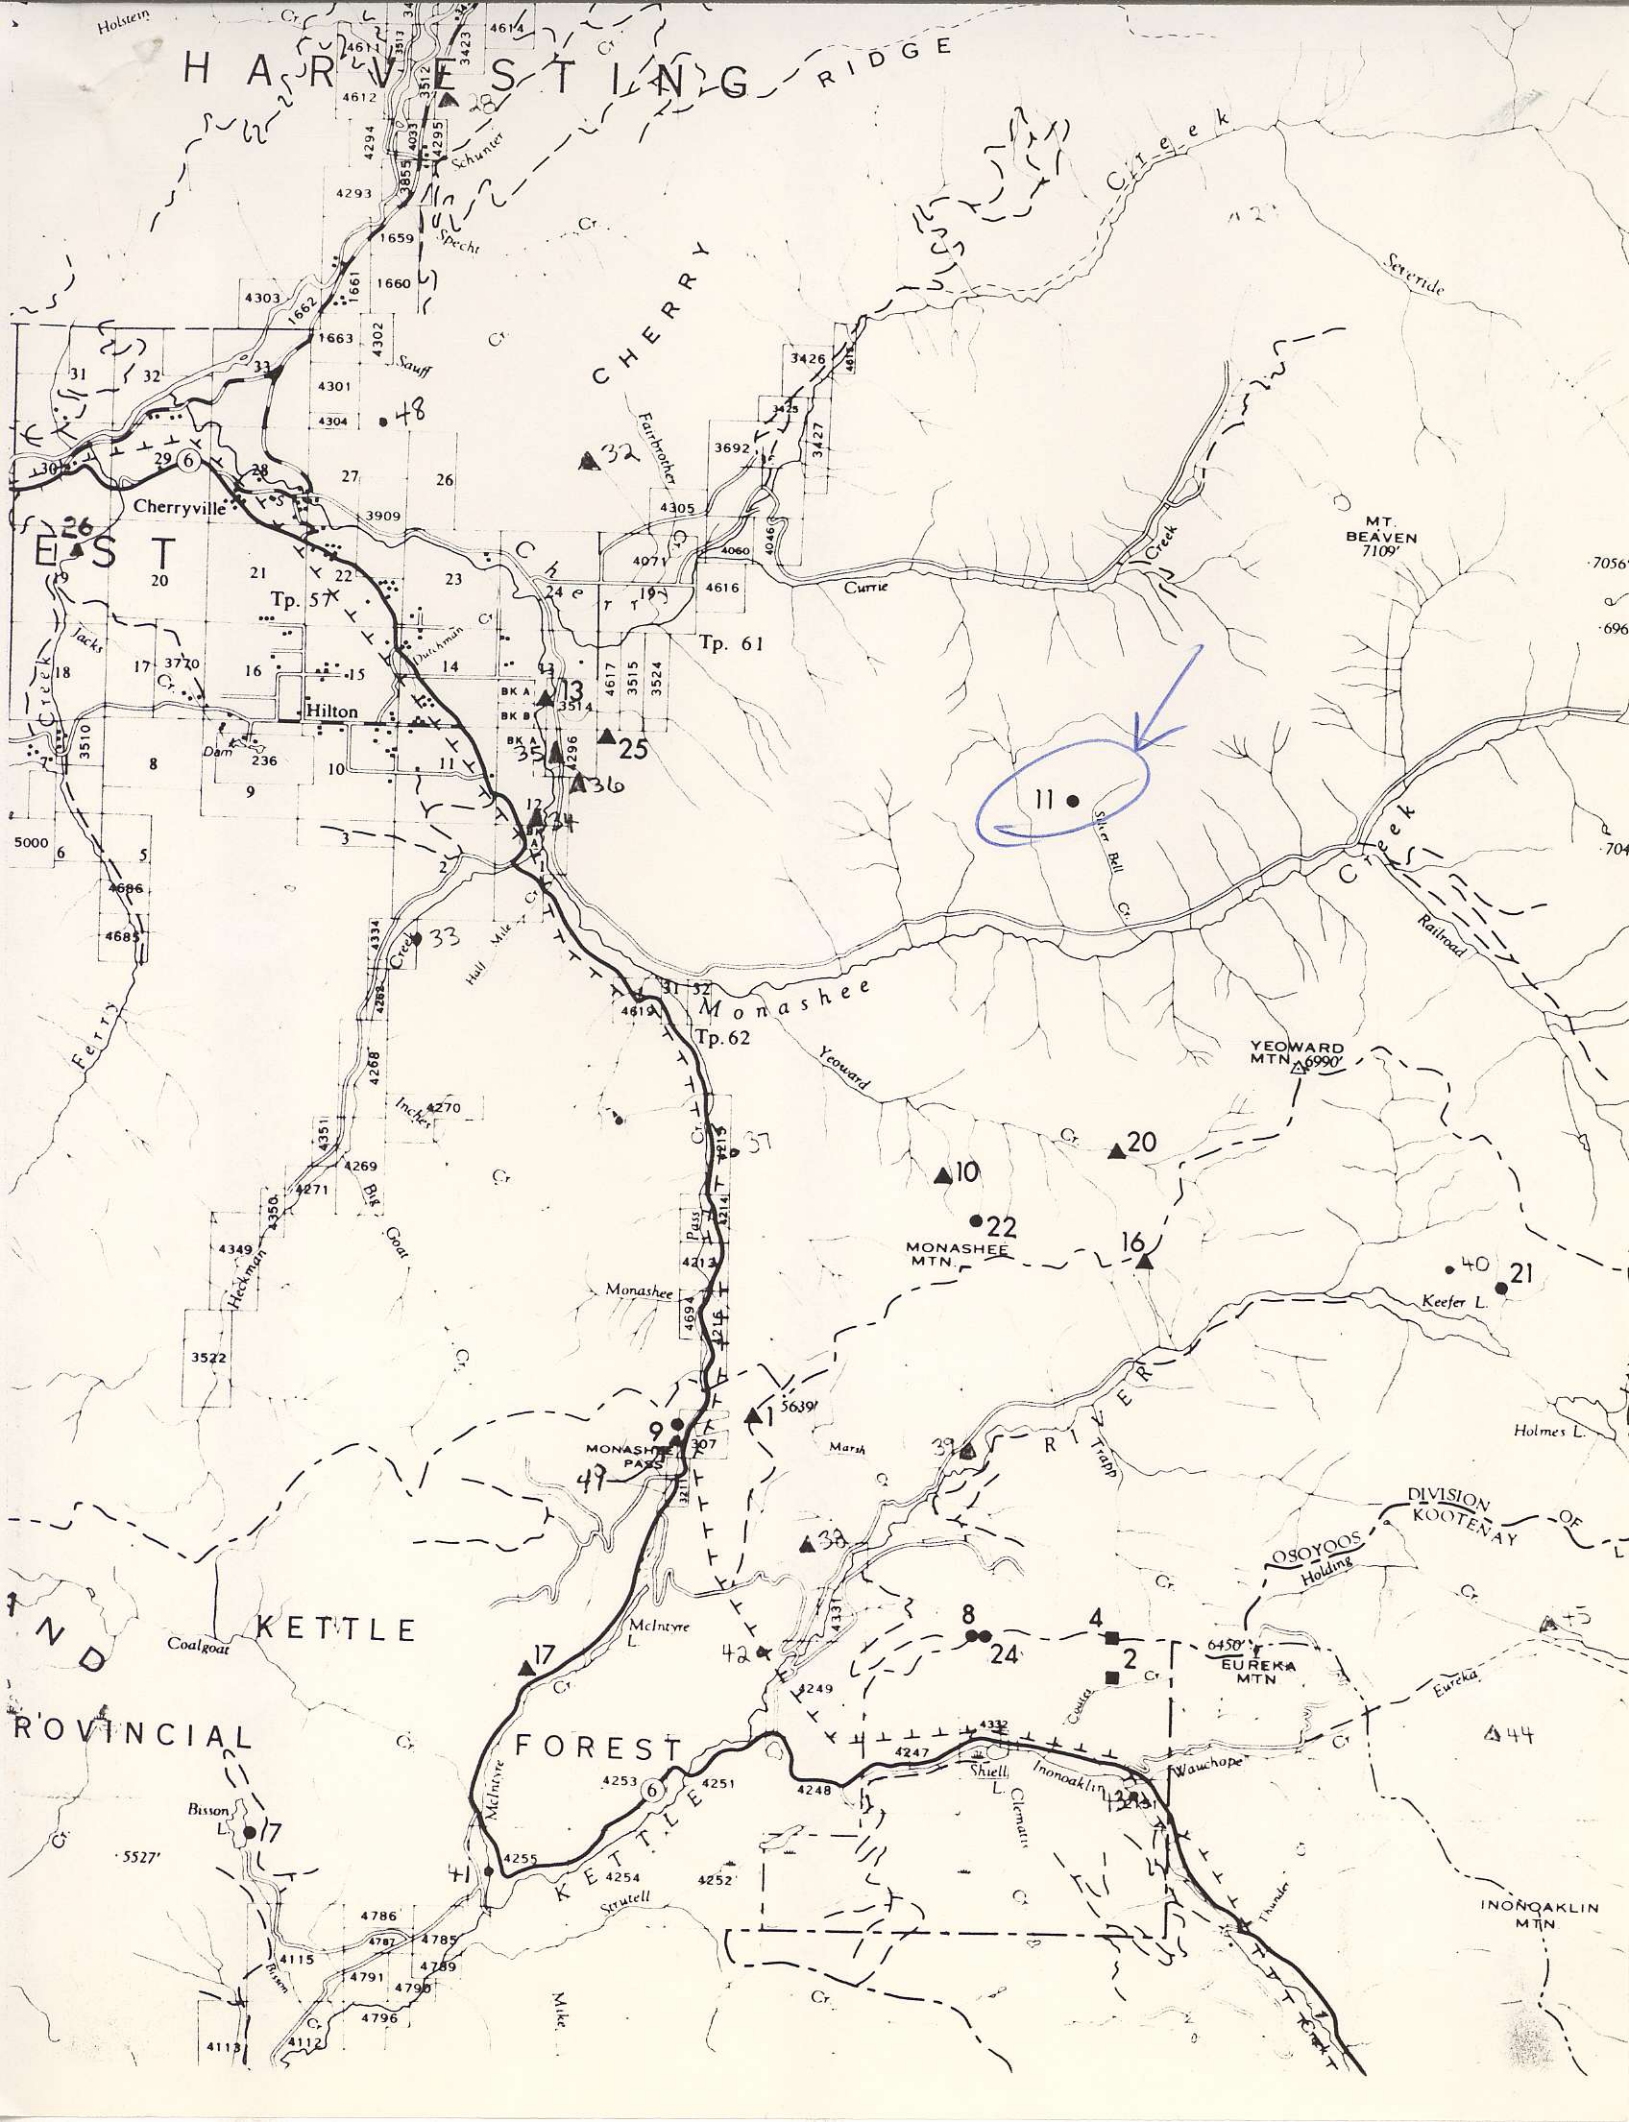

Hopeing that I may hear from you in the very near future along with the return of the documentation, I remain

  
J.E. Irwin
