Aug 2, 1973.

Dear Mr. Hiversidge;

In answer to your letter of July 28, 1973 Dad + I are now staying in the cabin on top of the hill - We spent some time making it habitable - a servicable roof, stove etc.

Dad is now in the process of blasting the overburden on the area where he promised you the high grade samples from. We came up here on the first and will be climbing down the evening of the 3rd. When we have acquired the samples Dad will be coming to town + will bring them to you at that time. The delay is regrettable but under the conditions completely unavoidable. Dad has been working practically all the hours that God sends ever since we got up here. I sincerely wish I had his endurance. I hope this information will help clarify things for you.

Any other information you require Dad will give you in the office.

Regarding the fridge, as far as I know Maurice has had no success in acquiring one. Quite frankly the possibility of us getting one from this end are slight. Perhaps not impossible but highly improbable. You can of course also discuss this with Dad when you see him.

Thank you for your letter + your concern,

Wishing all is well with you

Sincerely Dorothy Lee Thomson

P.S. Please excuse my writing + the form of this letter.
