

THE RUSTY GRANITE LOOKS FAVOURABLE FOR TIN. THE TIN
 SHOULD BE IN SKARNS ALONG THE LIMESTONE + SEDIMENTS OUTSIDE THE INTRUSIVE.
 DARYL BRUNS TELLS ME BRUCE BALLANTYNE
 OF THE GSC TOLD HIM UNION CREEK HAD SIGNIFICANT
 ALLUVIAL TIN AND THERE WAS A TIN ANOMALY IN
 THE REGION OF THE RUSTY GRANITE SHOWN. THERE
 IS NO EVIDENCE OF TIN IN THIS IMMEDIATE AREA ON THE REGIONAL MAPS
