Lion Claim Group  
9/3m/16

DEAR Carl

August 23rd

I have some information for you on the various claim lines in the Lion Group for Jois map. As you know the lines do not all run ~~straight~~ straight.

So: using 00 C.Line as our base line and running lines in either direction from that point I have found this:

at 8N there is a c.l at 26W + 20'W  
this line goes in to 20W at 100 S.

at 8N there is another c.l at 52W  
and this line runs in to 50W at 60S. or thereabouts.  
the last c.l line is at 78W at 8N and runs fairly straight to 71W at 59S. (labeled 425 on the map.)

As of ~~of~~ yesterday lines have been finished from 8S thru to 8N (85, 45, 00W, 4N, 8N) at 400' for a point. So you can add these points on to the map also. More info on back

In the south the lines are slightly more fucked.

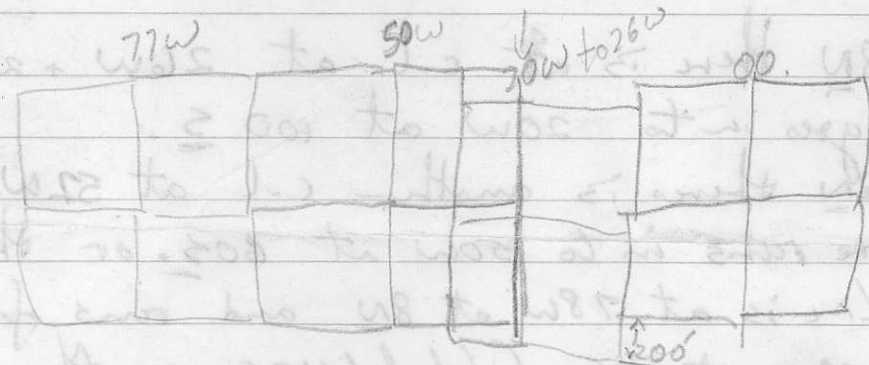

42W ← 845	00 → <del>14E</del> <sup>16E right</sup>	42W ← 805	→ 17E
<del>42W ←</del> 835	<del>14E</del> <sup>16E</sup> → 30E	42W ← 765	→ 15E
42W ← 925	00 → 14E	42W ← 725	→ 15E
22W ← 1005	00 → 14E		

Hope you find this interesting

Mark Dugan

I just remembered.

the claims ~~lines~~ in the center  
ie the claims with base line  
are 200' South of the others.

something like this ↖ example

MTD

1000 00 → ME  
 950 00 → ME  
 800 00 → ME  
 750 00 → ME

1000 00 → ME  
 950 00 → ME  
 800 00 → ME  
 750 00 → ME

Hopeful for the statement
