

PROPERTY

G.C. CLAIMS

LOCATION

Vancouver Island south of Great Central Lake.
North side of Mt. Porter.

ACCESS

Helicopter

OWNERS

Sam Craig, Ron Bilquist, Gabriola Island VOR 1X0
Phone: 247-8363

COMMODITIES

Reported gold values to 0.40 oz/ton

SAMPLE RESULTS

Bilquist had list of relatively low sample results
which we did not copy.

GEOLOGY & MINERALIZATION

Bilquist showed photos of relatively large quartz vein system on steep face over width? of 40 metres?. In photo this appears to be a steep quartz vein system over 15 feet? but cut off down dip at sharp flat fracture where it appears to narrow. Rock specimens included one open breccia with drusy quartz veining. Sample of fairly massive (crumbly) fine dark pyrite was reported to carry gold.

OPINION

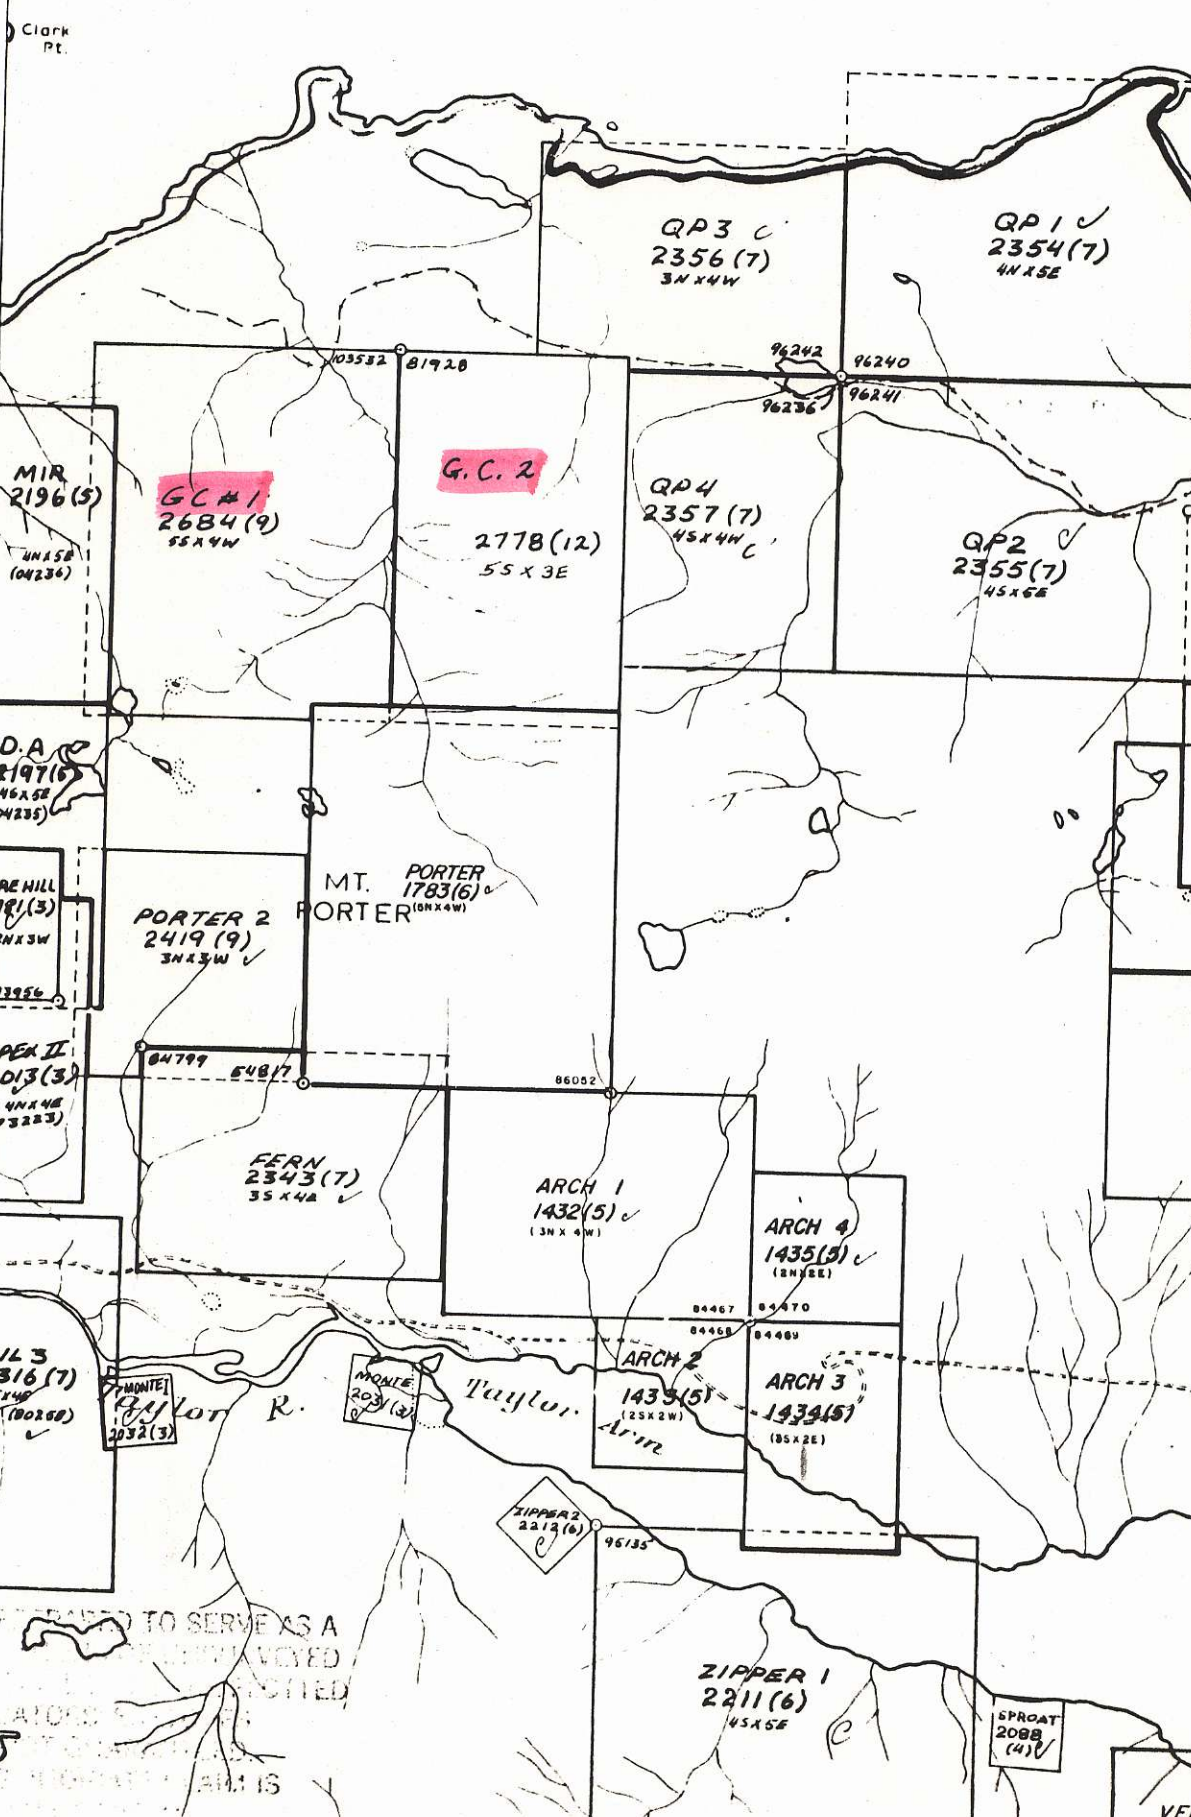

Appearance of rock samples and photos did not look attractive enough to warrant helicopter charter.
