

139 large blocky qtz  
below line large qtz block  
patch stretching 40-50' downhill  
max width 15'  
+ width

141 qtz blocks  
intercepted?  
falls down same slope 60'+  
top width 5'

140 grass hill top  
mass covered talus  
exposed

142 qtz boulders 3' x 3'  
muddy  
pebble mixed at  
downhill side 60'+

143 strike of 144  
bench - real  
- muddy qtz - small blocks

144 large white qtz blocks  
15-18' wide  
little muddy surface  
- more swaley this 145  
+ downhill

145 - cont qtz blocks

147 white qtz

148 white, muddy qtz  
+ sericite (grey) rubble blocks

Flipped 141

Dykes

"Snake" on surface  
 are 6-8' wide  
 indicated by wedged fractions  
 of rock generally 2-10" long, 1-4"  
 fracture may have  
 lamination  
 - frost heave  
 - bleached w/ intrusive dykes  
 - do not follow foliation of schist.

165  
 schist outcrop  
 little gte  
 55' along from dyke  
 Qtz abund. schist 165A

177  
179  
180

176  
granite schist  
- veins of buff quartz 2-3"  
following schistosity common  
no absolute indication of cross-  
cutting gtz.

178  
granite vein outcrop  
boulders down hill 45°  
chem. chip sampled

191  
porphyritic dyke  
aligned feldspar

195  
schist outcrop  
c. 1/2-1/4 Qtz

204  
Vole outcrop  
Py cubes  
limonite stain horizon  
W. low → 205

205  
Can sample  
qtz boulders
