

DRAFT PROFILE.

672403

Surface exposure suggests 20 million ton probable. 

PROPERTY NAME: QUESNEL LIMESTONE B.C.
 PROPERTY STATUS: 6, val samples from three pits confirm high quality limestone.
 PROPERTY OWNER: Through Steve Macdonald, Panow Mineral Development Corp.
 PROPERTY SIZE: QUAD MINERAL CLAIMS (Quads 2-12 Quad 1-5?)
 QUARRY LEASE FOR AREA OF 4.486 HECTARES

PROPERTY LOCATION: 53 km southwest of Quesnel B.C. on Narcosisi Creek west of the Fraser River.

PROPERTY ACCESS via the Garner Road west

GEOLOGY: Limestone exposure of 450 metres by 100 to 200 metres with up to 80 metres vertical relief.

The limestone is recrystallized to the north east where it is intruded by granodiorite with alteration to dolomite

DESCRIPTION: A limestone source has been staked and a quarry permit obtained in preparation for production of limestone, lime, decorative rock, soil conditioner and landscaping products.

Analysis of the limestone indicates CaO content of 54%, 0.5% SiO₂, 0.17% Fe₂O₃ and 0.56% MgO.

The dolomitic zone contains 15% - 17% MgO.

Approaches have been made to ~~various~~ pulp and paper and to mining companies regarding their requirements. A possible market is indicated for 36000 tons of limestone and ~~110000~~ 110000 tons of lime.

Agreement Sought:  Either partnership ~~or~~ Partnership in development
 or
 outright sale ~~\$1.3 million~~ negotiable
