The Exploration Department is prepared to undertake an electromagnetic survey over the Wallace sediments in the area you indicated to Jack Crowhurst and myself. This will involve an accurate grid layout - lines 200 feet apart with stations at 100 foot intervals - all laid out on a plan.

As we expect to be very busy in the field from March on, can we count on your staff looking after the business of laying out the grid? If so, we can undertake the geophysical work during the first part of February.

Please let me know your thoughts,  
Regards,

Yours very truly,
