Dear Cam,

The airphotos for TEEPEE PEAK are not included in this report as Eleanor told us we would need them in our next camp. I'm sending my sketches from FF inked but with some pencil remarks still on them. I was not sure just what you wanted left on or inked in. Please do not erase them as I still would like them. The KEY group report & map are almost complete. We have not yet inked the map - do you want it inked? That is about all to be done for that project. Next week will send in conclusions to KEY group, TEEPEE PEAK and our next project. I hope this weeks report is satisfactory.

Alison & Norm say hello too! Hope things are running well there.

Mary.

32857 Blacking altered diorite? Dense, heavy.

Cancel

32858 Granite/pyroxite with arsenic
