January 18, 1988

Mr. Sam Craig
Box 71
Tofino, B.C.
VOR 2Z0

Dear Sam:

Enclosed are copies of the analysis results of the three samples submitted from your property east of Port Alberni by Grizzly Creek Resources Ltd. The sample numbers 58379 - 381H are from the sample book used in my office. Sample 58379H contained no significant gold or silver but is slightly anomalous for copper and arsenic and is quite anomalous for antimony (Sb).

Sample 58380H contained 20 ppb gold which is not enough to be considered anomalous. It is weakly anomalous arsenic at 80 ppm and anomalous in copper at 2590 ppm. Antimony content is not significant. Silver content is very weakly anomalous at 1.4 ppm. Sample 58381H contained no significant gold, silver or arsenic. Copper is anomalous at 2260 ppm.

These values were considered too low for the purposes of Grizzly Creek but they do demonstrate the presence of some mineralization and in this well located area I feel the property deserves an organized exploration program.

Yours very truly,
J.C. Stephen Explorations Ltd.
