Phone conversation with Bill Meyer, Teck Corp following my call to his Office yesterday regarding the Redonda Redondita claims on West Redonda Island (Old Red Group restaked 1978 by Teck & staked by SCS for Mastodon Highland Bell 1964 on prospectors interest).

Teck drilled nine holes to 600' depths (approx) and have carried out various technical surveys.

Enlarged target areas indicated and possible joint venture has been discussed on basis of matching past expenditure plus risk consideration.

He asked who was interested and I said Dome Exp.

He to check on attitude in their Office & call me back for possible check of data Sept 19.

J.M.
