Dr. W. R. Bacon.

Dear Bill:

Thanks for the Twin Group data which I return herewith.

I note that according to a letter from McDougal the claims are in good standing until August 7, 1974.

After going through the file I could not see any particular place to go looking for grades better than the .2% Cu in the drilling. One might get a better feel for it on the ground, and I will try to get in for a look around this summer, but we don't rate it high enough on present knowledge to spend anything on it.

I can't think of any likely customer unless some promoter is under the impression it is adjacent to the Sustut action.

Yours very truly,

D. H. JAMES, P. Eng.,
Geologist.
