August 3 1973

Dear Bill.

The following are some dates, costs etc for preparation of an I.P. assessment report for the ROSO claim group. The IP data and some information regarding claim names and geology were forwarded to Lance Kennedy Aug 1 by registered mail

<u>CLAIMS</u>	<u>RECORD No's</u>	<u>RECORDED</u>
ROSO 1-12	115376-387	AUG 29 1972
13-24	115667-678	SEPT 6 1972

The group is located 10 miles west of Babine Lake and two miles north of Fulton Lake at an elevation of 3000 feet.

D Morrison and Marcell Arsenault conducted the IP survey between July 6 and 15. The costs are on the time sheets previously sent in to the office and comprise 7 operating days, 1 for mobilization and 1 for weather. (9). A total of 11.7 miles were surveyed.

Helpers on the survey were J. Fowler + J. Zanatta at \$600 and \$650 / month respectively - employed from July 4 - 15. (Two days early to set up camp and clean up creek around landing pad.)

JC Stephen - supervisor July 11

Helicopter - July 4, 6, 11, 15 Total 4 hours at \$150

Camp supply ~~40~~ 40 mandays @ \$4 / manday.

Line cutting was done by J. Zonatta and J. Fowler between June 19-27 on contract. I don't seem to have a copy of the cost here but it was in the order of \$1400.

These costs should be sufficient to hold the 24 claims for one year pending developments on surrounding claims.

City Service is planning an 800' hole on an IP anomaly south of Fulton Lake which appears to be on strike and possibly similar to these anomalies.

Best regards

Carl
