- andesites
 no mineralization

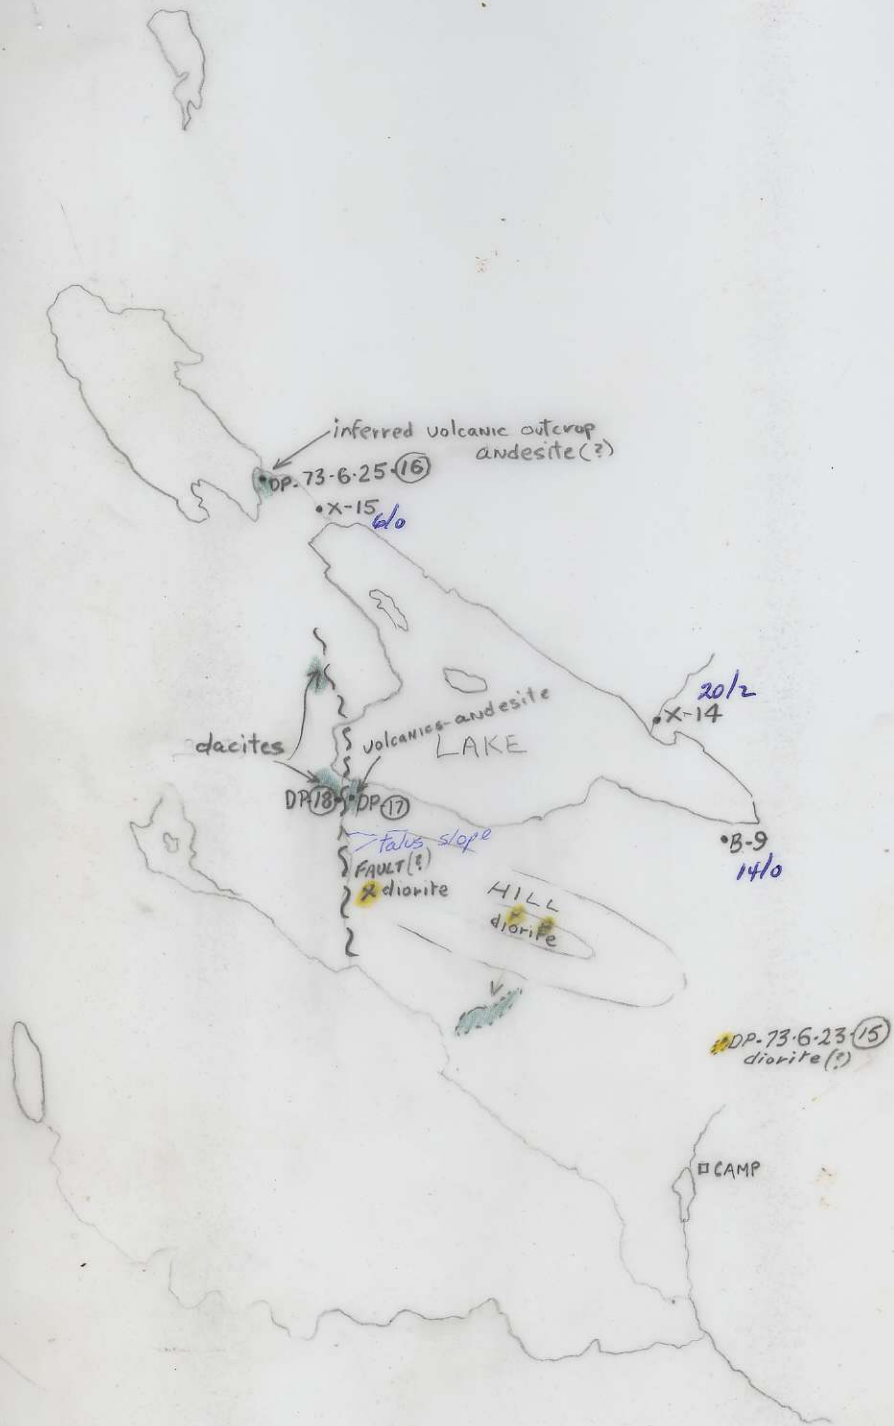

- sandstone (SW CAMP.)
 no mineralization
 grains of magnetite

DP.73-B-2.73 Float in E-drainage creek
 ~ 3000' SE camp; gray fine grained
 volcanic with calcite veinlets and
 chalcopyrite (<.5%). DP.73-B-2.73 B about
 10' from 73A. same rock type. Mn. chalcopyrite.
 — ONE other piece float 100' downstream with grain of Cu.
 same rock type.
