

CAMP ECHO

RE: MAG ANOMALY WEST OF EVER GREEN
TANYA GROUP

DATES: AUG. 20, 22

MOVED IN 18-19 ; 21 RAIN DAY

PHOTOS: BC 5440 - 246, 247, 248 ;

BC 5175 - 262 ; BC 5440 - 279, -278

SILTS: T-37 to T-59

T-140 to T-146

LEGEND:

qtz monzonite; med. grained,
non porphyritic, abundant biotite,
barren

rhyolite

siltstone, shale and minor
conglomerate thermally meta-
morphosed adjacent to intrusive
(see notes) barren

COMMENTS:

1. MAG ANOMALY outlines intrusives
2. other hills not featuring mag anomaly show no intrusives
3. one more day would have been necessary to cover area but considering
a) that the rock was barren b) and
Colleen's burn it was desirable to move
when we did.
