PROPERTY.

~~AS~~ ASPEN DP TAYLOR ^{Dec} 1984 54000t @ 6.85% Ag
82F/3E + 73400t ~~indicated~~

~~5~~ 5km East of Salmos

Total recorded Production 42- ~~4~~ tons average.

approx 0.03 oz Au, 29.5 oz Ag 3% Zn 3% Pb

The nearby HB mine from 1912 to 1950 averaged
1.34 oz Ag ~~1.34~~ 17% Zn 6.86% Pb

Ex total (1980-81) "effectively defined and limited the silver mineralization and allowed fairly precise ore grade and tonnage calculations."

Dr de Quadros ... calculates the reserves at 54146 tons

of 6.85 oz / ton of drill proven ore with minor lead zinc and trace copper and gold values. The average thickness of this zone is 11.17 feet. Dr de Quadros also specifies 13428 tons of indicated tonnage of similar ~~grade~~ grade material.

Program recommended = \$60,000 essentially for detailed prospecting
