

674476  
Westmount  
Mine 82F/14

July 5, 1976.

Mr. J.R. Billingsley,  
Dusty Mac Mines Ltd.,  
Box 402,  
Okanagan Falls, B.C.

Dear Jim:

Our mutual friend Len White suggested that I write this letter to you.

2 Bacon & Crowhurst and J.K. Campbell have an option on the Westmount Mine which is situated on Enterprise Creek, 5 miles by fair gravel road from the main Slocan Valley Highway. The terms of this option involve a cash payment of \$30,000 to Mr. Jim Cullinane (of "Connors" fame), but the method of payment is negotiable.

3 The property consists of 9 Crown Granted mineral claims and is owned outright by Mr. J. Cullinane together with one or two of his partners.

4 I am enclosing a copy of a report written by Mr. John Lamb, P.Eng., for Eastmont Silver Mines Ltd. in relation to an option held by them 6 or 7 years ago. This option has been formally relinquished.

5 I think that the logical procedure would be to drill some down holes from the crosscuts at the innermost end of No. 4 level to determine the possible extension downward of the north ore shoot and the grade of the mineralization. Should this be successful, a decline could be driven downward at say  $-15^{\circ}$  from the face of No. 5 level, from which it is possible about 6000-7000 tons of ore might be stoped upward.

6 The hopes are, of course, that the downward extension would be of the same grade, namely 33 oz. of silver, 3% lead and 6% zinc, as estimated by Mr. Lamb for the ore mined upward from 4 level over a vertical distance of 470'. Possibilities of other parallel lodes with perhaps blind sections of mineralization can also be investigated.

It occurred to me that perhaps your company might be interested in participation one way or another. We would be pleased to discuss this project with any of your friends or associates should you deem it worthwhile.

Best regards,

Yours very truly,

BACON & CROWHURST LTD.
