~~Jeff Ronzon~~ April 15/91

Push L has 500mt ±

at .21 % Cu, .0202 Au

(.01502/t Au = 0.15 g/t)

Oct 22/91 release G. Jones

600 mt .28 % Cu + .0150 g/t Au

Oct 29/91

Visited Fish Lake office, talk to Jeff Froyen, Nadia

1. Fish Lake: 5 new drill holes released avg 2182' @ .32 Cu
 .016 Au

≡ 600 m tons of .86 Cu equiv.

≡ 10M oz Au @ 4 B lbs Cu.

Tipper Kingsvale Gr = OK Benamman ≡ 91-97.5 on DNA scale ^{homfels 77.8 Au?}
Campman.

South dipping gentle ($\sim 5^\circ \pm$) fault cuts off min at
 $\sim 2500'$ depth.

Kingsvale (OK) bedded kuffite above fault, hosts are
 below fault: coarse pyroclastic breccia.

Some alteration in F.W. of fault - pot ore(?)

Cu men py > bn $\sim 10:1$. Controlled by several
 intramarginal dykes, strike NE, dip SE qtz decr,
 qtz-felds prop.

Alteration qtz-biot-magnetite \pm chlorite. No Kspar

Sericits only late, high level, related to one dyke
 set.

Abund f.j. dark hydroth kuffite for dady. Question
 re homfels vs hydroth kuffite Van Riet Payne not sure.

Small effects of dykes by pot ore NNE faults.

Major prograde subequation to N & SW - why?

Like Island Cu - control men by dyke swarm.

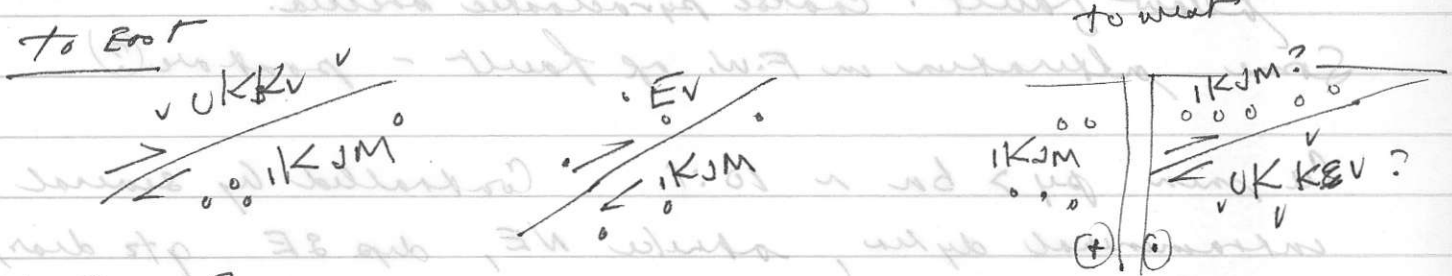

Nadia says Kingsvale all kuffite, no aida at mine

Derik Tharkelom changed Kinyrath Crp. to Spina Bridge
GP . Smyrath obsolete

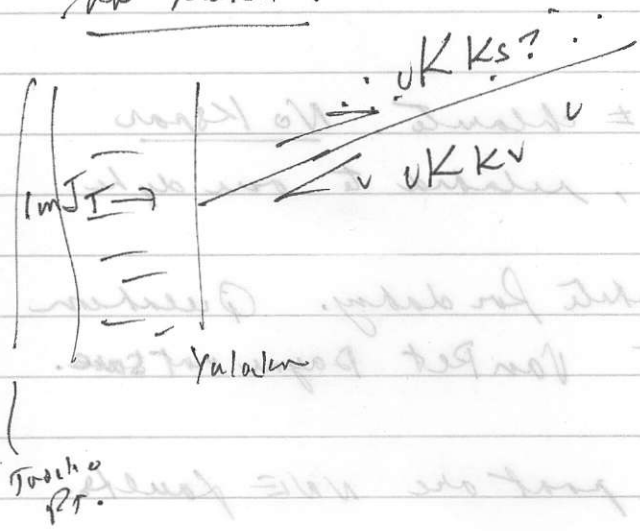

McLaren map 920/4 Searrya mapped 920/3 check.

Peter V. says "Smyrath" now old or Nhian.

Tip says Nuzry Valley thrust is probably also
 to W of Rosh - rocks like Jackson Mts. ∴ thrust
 through orobody probably is Nuzry Valley thrust.

Rosh ?
