Patented in listwanites in Bridge R - Lillooet Cache Creek area

Worked on Eldorado Peak prospect adjacent to
Silverquick - under option to Placer until last
year. Previously explored by Pan Ocean, had
Au geochem anomalies, arsenopyrite float, quartz-
carbonate stockwork. Associated altered pyritic
Silverquick Hg dykes

In Re Ox altered conglomerate that produced
minor Au on assaying. No visible W.

Worked on Seneca - found new Cu Pb Zn
vein in brecciated porphyry 2-3 km distant
from Seneca. May be feeder zone. Broad
alteration. Porphyry abundant locally, not
at Seneca. Lithologic correlation between
Seneca & showing is uncertain.

Porphyry stock dated by SWMM at 160 Ma.
may be synvolcanic.
