Spruce Mountain - Surprise Vein and/or Tranche

- (14) SUP 2 foliated qtz-carb-fuchsite altd serp (?)
+ qtz unit stkwk.
- (15) SUP 3 similar to above. Dk green-black network vnlts
of magnetite (?) + chromite (?) ± carbon (?)
- (16) SUP 4 foliated buff wx qtz-carb-fuchsite + dk
mineral laminae. Similar to 2 + 3.
- (17) SUP 5 Dense coarse grained non foliated buff wx
2m greenish grey listwaite. vfg fuchsite.
Black mineral specks.
- (18) SUP 6 Grey-white eg. crudely lamin listwaite
5-10m Heavy - siderite (?) muscovite, no vis fuchsite.

Specimens sent to Chemex Feb 12/85-

84-1 B (between 84, A + C?) altd UM, partially
oxidized carbonate altd, adj Au qtz vein.

84-1 F, 84-1 J in second sequence of
specimens returned from Au vein.
Compact, partly oxidized silica-carb altd UM.

D-40 Serpentine - location? - uncarbonated
green, sealy, non-talcose

- 2953 Golden View PbSn
on listwanite (oxid).
